Projects

Personal Website   Toronto, ON
https://www.identang.com   *Aug 2023 - Current*

- Written in Next.js, Typescript and Chakra UI

- Hosted in Vercel with domain registered on Google Domain

Work Experience

Depths (https://www.depths.so/)   *Savvy Tech Limited | Hong Kong*
Software Engineer   *Nov 2022 – May 2023*

- Led the implementation of the new product, Depths, as the company's first hire.

- Designed the user requirements with co-founder in a scrum process by developing personas, use cases and user stories.

- Created a stacking grid and resource cards to empower users to explore, curate, and upvote inspiring resources using Next.js, Typescript, and Chakra UI.

- Created the user profile, directory, user activation and forget password pages. For forget password pages: Called a middleware API to generate one-time token from Node.js backend and merged it to a link. Triggered AWS Lambda function to the AWS Simple Mail Service for sending the password recovery link to the user.

- Worked with technical co-founder to develop internal API, designed, and implemented frontend user interface using RESTful API and GraphQL.

Walt Disney Company   *Hong Kong*
Intern, Technology & Digital Department   *May 2022 – Jan 2023*

- Investigated incidents from support tickets and resolved system problems for internal employees in an agile environment. Validate solutions with software engineers and users from other internal departments. Wrote SQL queries to fix data inconsistency.

- Defined user requirements with marketing departments and translate them info functional requirements for the development of mini program in WeChat. Prioritized, communicated bug fix and negotiated release timeline with the vendor, Tencent, by hosting weekly and ad hoc meetings.

- Gathered user requirements, designed functional requirements, conduct test cases for multiple projects, including the elastic search function of official website, AR hotel room tour, mobile app download page, device renewal and car park system integration project. Delivered systems training sessions to 5 other lines of business.
